Lyapunov Matrix Equation in System Stability and Control
by Z. Gajić and M. Qureshi

Last Update: August 1, 1996

page 5, Definition 1.1, replace "open" by "closed".

page 5, Definition 1.2, replace "closed" by "open".

page 6, Theorem 1, replace "An equilibrium point" by "The equilibrium point $x = 0$". Also replace, "the system is asymptotically stable" by "the equilibrium point is asymptotically stable."

pages 192–193, 201–202, use v instead x to denote the eigenvectors.

page 234, transpose the last matrix in formula (8.56).
