Contents

Preface.....iii

Chapter 1. Introduction..... **1**
1.1 The Recursive Approach..... 4
1.2 The Essence of the Hamiltonian Approach..... 14
1.3 Overview..... 20
References..... 22

Chapter 2. Continuous-Time Linear Optimal Control Systems..... **29**
2.1 Exact Decomposition of the Algebraic Riccati Equation..... 30
2.1.1 Case Study: Magnetic Tape Control..... 41
2.2 Open-Loop Singularly Perturbed Linear Control Problem..... 41
2.2.1 Case Study: Magnetic Tape Control..... 46
2.3 Kalman Filtering for Linear Singularly Perturbed Systems..... 47
2.3.1 Case Study: An F-15 Aircraft..... 56
2.4 Optimal Linear-Quadratic Gaussian Control..... 57
2.4.1 Case Study: LQG Controller for an F-15 Aircraft..... 60
2.4.2 Case Study: LQG Controller for an AIRC Aircraft..... 61
2.5 Comments..... 64
Appendix 2.1..... 64
Appendix 2.2..... 65
Appendix 2.3 New Version of the Chang Transformation..... 67
References..... 69

Chapter 3. Discrete-Time Linear Optimal Control Systems **73**
3.1 Linear-Quadratic Optimal Control 75
3.1.1 Case Study: Discrete Model of an F-15 Aircraft 85
3.2 Kalman Filtering for Discrete Singularly Perturbed Systems 87
3.3 Linear-Quadratic Optimal Gaussian Control Problem 94
3.3.1 Case Study: A Steam Power System 98
3.4 Open-Loop Discrete Singularly Perturbed Control Problem 99
3.4.1 Case Study: An F-8 Aircraft Control Problem 105
3.5 Comments 106
Appendix 3.1 108
Appendix 3.2 108
Appendix 3.3 110
Appendix 3.4 New Version of the Chang Transformation 111
References 112

Chapter 4. Optimal Control and Filtering of Multimodeling Structures **117**
4.1 Decomposition of the Regulator Algebraic Riccati Equation 119
4.2 Decomposition of the Optimal Kalman Filter 132
4.3 Case Studies 139
4.3.1 Power Plant Control System 139
4.3.2 Filtering Problem for an Automobile 141
4.4 Comments 143
Appendix 4.1 143
Appendix 4.2 148
Appendix 4.3 149
Appendix 4.4 150
References 152

Chapter 5. H_∞ Optimal Control and Filtering **155**
5.1 Basic H_∞ Controllers of Linear Systems 157
5.2 Singularly Perturbed Optimal H_∞ Control Problem 160
5.3 Solution of the Singularly Perturbed H_∞ Algebraic Riccati Equation 162
5.3.1 Case Study: H_∞ Optimal Control of an F-8 Aircraft 169
5.4 H_∞ Filtering 170
5.5 H_∞ Filter for Singularly Perturbed Systems 173
5.5.1 Decomposition of the H_∞ Filter Algebraic Riccati Equation 174
5.5.2 Decomposition of the Singularly Perturbed H_∞ Filter 180
5.5.3 Case Study: H_∞ Filter for an F-8 Aircraft 183
5.6 Conclusions 184
References 185

Chapter 6. High Gain, Cheap Control, and Small Noise Problems 191
6.1 Linear-Quadratic Optimal Continuous-Time High Gain and Cheap Control Problems..... 192
6.1.1 High Gain Optimal Feedback Control..... 193
6.1.2 Optimal Cheap Control Problem..... 195
6.2 Open-Loop Continuous-Time Cheap Control and High Gain Problems.. 196
6.3 Slow-Fast Decoupling of the Cheap Control/High Gain Continuous-Time Algebraic Riccati Equation..... 200
6.4 Small Measurement Noise Continuous-Time Kalman Filter..... 206
6.4.1 Exact Local Filter Decomposition..... 210
6.4.2 Case Study: Kalman Filtering for a System Positioning Problem... 217
6.5 Cheap Control Problem for Sampled Data Linear Systems..... 218
6.6 Comments..... 226
Appendix 6.1..... 226
Appendix 6.2..... 227
Appendix 6.3..... 228
References..... 229

Chapter 7. Eigenvector Approach for Slow-Fast Decoupling 235
7.1 Exact Slow-Fast Decomposition of Singularly Perturbed Systems: A Summary 236
7.2 The Eigenvector Method for Nonsymmetric (Nonsquare) Algebraic Riccati Equation 241
7.3 Exact Decomposition Algorithm for Singularly Perturbed Systems 245
7.4 Exact Decomposition Algorithm for Regular Systems 251
7.5 Case Studies..... 252
7.5.1 Case Study: Fluid Catalytic Reactor..... 253
7.5.2 Case Study: Inverted Pendulum..... 254
7.6 Conclusions..... 256
References..... 256

Chapter 8. Additional Topics 259
8.1 Nonstandard Continuous-Time Singularly Perturbed Linear Systems..... 260
8.1.1 Optimal Control of Nonstandard Linear Systems..... 262
8.1.2 Kalman Filtering for Nonstandard Linear Systems..... 267
8.1.3 Linear Quadratic Optimal Stochastic Controller..... 270
8.1.4 Case Study: A Flexible Space Structure..... 272
8.2 On the Finite Horizon Feedback Optimization Problem..... 275
8.3 Slow-Fast Decomposition of Fridman, Sobolev, and Strygin..... 284
8.3.1 Integral Manifolds for Singularly Perturbed Systems..... 285
8.3.2 Linear Optimal Control via Slow and Fast Integral Manifolds..... 289

8.4 Conclusions..... 293
Appendix 8.1..... 293
References..... 299

Chapter 9. Concluding Remarks..... 303
References..... 304

Index..... 307
