JOURNAL PAPERS:

IEEE Transactions on Automatic Control

1. H. Khalil and Z. Gajic, “Near-optimum regulators for stochastic linear singularly perturbed systems,” *IEEE Transactions on Automatic Control*, Vol. AC-29, 531–541, June 1984.
2. *[2]T. Grodt and Z. Gajic, “The recursive reduced-order numerical solution of the singularly perturbed matrix differential Riccati equation,” *IEEE Transactions on Automatic Control*, Vol. AC-33, 751–754, Aug. 1988.
3. * Z. Gajic, D. Petkovski and N. Harkara, “The recursive algorithm for the optimal static output feedback control problem of linear singularly perturbed systems,” *IEEE Transactions on Automatic Control*, Vol. AC-34, 465–468, Apr. 1989.
4. * X. Shen and Z. Gajic, “Optimal reduced-order solution of the weakly coupled discrete Riccati equation,” *IEEE Transactions Automatic Control*, Vol. AC-35, 1160–1162, Oct. 1990.
5. * Z. Gajic and X. Shen, “Parallel reduced-order controllers for stochastic linear singularly perturbed discrete systems,” *IEEE Transactions on Automatic Control*, Vol. AC-36, 87–90, Jan. 1991.
6. * W. Su and Z. Gajic, “Reduced-order solution to the finite time optimal control problems of linear weakly coupled systems,” *IEEE Transactions on Automatic Control*, Vol. AC-36, 498–501, Apr. 1991.
7. * W. Su, Z. Gajic and X. Shen, “The recursive reduced-order solution of an open-loop control problem of linear singularly perturbed systems,” *IEEE Transactions on Automatic Control*, Vol. AC-37, 279–281, Feb. 1992.
8. * M. Qureshi and Z. Gajic, “A new version of the Chang transformation,” *IEEE Transactions on Automatic Control*, Vol. AC-37, 800–801, June 1992.
9. * W. Su, Z. Gajic and X. Shen, “The exact slow-fast decomposition of the algebraic Riccati equation of singularly perturbed systems,” *IEEE Transactions on Automatic Control*, Vol. AC-37, 1456–1459, Sept. 1992.
10. * Z. Aganovic and Z. Gajic, “The successive approximation procedure for finite-time optimal control of bilinear systems,” *IEEE Transactions on Automatic Control*, Vol. AC-39, 1932–1935, Sept. 1994.
11. * Z. Gajic and M. Lim, “A new filtering method for linear singularly perturbed systems,” *IEEE Trans. Automatic Control*, Vol. AC-39, 1952–1955, Sept. 1994.
12. * Z. Gajic and I. Borno, “Lyapunov iterations for optimal control of jump linear systems,” *IEEE Transactions on Automatic Control*, Vol. AC–40, 1971–1975, Nov. 1995.
13. * D. Popescu and Z. Gajic, “Singular perturbation analysis of cheap control problem for sampled data systems,” *IEEE Transactions on Automatic Control*, Vol. 43, 2209–2214, Nov. 1999.
14. * C. Coumarbatch and Z. Gajic, “Exact decomposition of the algebraic Riccati equation of deterministic multimodeling optimal control problems,” *IEEE Transactions on Automatic Control*, Vol. 44, 790–794, May 2000.

IEEE Transactions on Circuits and Systems

15. M. Lim and Z. Gajic, “Reduced-orded H_∞ optimal filtering for systems with slow and fast modes,” *IEEE Transactions on Circuits and Systems—I: Fundamental Theory and Applications*, Vol. 47, 250–254, Feb. 2000.
16. * Z. Gajic and I. Borno, “General transformation for block diagonalization of weakly coupled linear systems composed of N subsystems,” *IEEE Transactions on Circuits and Systems—I: Fundamental Theory and Applications*, Vol. 47, 909–912, June 2000.

IEEE/ACM Transactions on Networking

17. S. Koskie and Z. Gajic, “A Nash game algorithm for SIR-based power control in 3G wireless CDMA networks,” *IEEE/ACM Transactions on Networking*, full paper in press, 2005.

IEEE Transactions on Wireless Communications

18. L. Qian and Z. Gajic, “Covariance minimization stochastic power control in CDMA systems,” submitted to *IEEE Transactions on Wireless Communications*, full paper in pres, 2005.

[2] * indicates papers done with my graduate students

IEEE Journal on Selected Areas in Communications

19. L. Song, N. Mandayam, and Z. Gajic, "Performance analysis of an up/down power control algorithm in fading channels using statistical linearization," *IEEE Journal on Selected Areas in Communications*, Vol. 19, 277–286, Feb. 2001.
