## Overview

Do you have a parking lot that suffers from congestion? Do you worry that your lot is not being used effectively? Do you dread losing money to competitors?

We have a solution for you: AUTomatedPARK.

AUTomatedPark was developed to automate a parking garage. This program will keep track of available spots to minimize congestion and maximize occupancy. It is scalable to any number of floors and spots on each floor. It keeps track of various types of customers and allows you to set different prices for each type of customer. So automate your

## Garage Owners

Your customers will simply register, reserve and park. Make a one time reservation or reserve spots on a monthly basis. All required information is stored in a database and is completely automated. Adopting this system will save you the cost of hiring an operator.

You will also have the luxury of monitoring incoming and outgoing traffic of the garage. Maximize revenue by setting prices according to traffic trends.

Simplify your life and garage with a program that handles and organizes all of the meticulous details.

Pricing scheme for this garage are as follows:

- Reservation : \$5.00/hr
- Overstaying a reservation: \$10.00/hour
- Monthly Contract: \$250/month
- Walk-ins (without reservation): \$7.00/hr

## Garage Users

You will never have to go from garage to garage looking for spots. You will never have to worry about having a place to park. You will never have to spend hours looking for a spot in a garage. With just a few strokes on your keyboard and a few clicks of your mouse, reserve a spot and rest assured that you will have a spot waiting for your arrival. Give time to more important things than chasing elusive parking spots.

AUTomatedPARK makes all this happen.

### Make Reservation

\*Reservation Type

☒ One-time reservation

☐ Monthly Contract

\*Note: You can schedule a reservation only for within the next 2 months.  
You can have no more than five pending reservations at a time.
