A New Future

1 Why us?

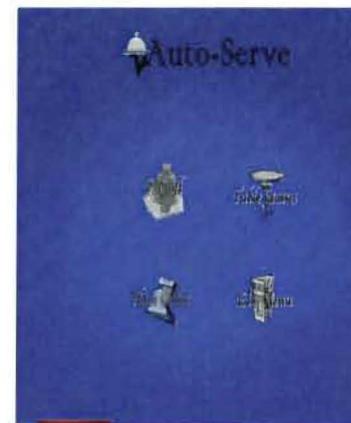

Various issues that are present in the restaurant business are addressed in this system. There will be no more need to be completely reliant on waiters with the **reliability** of the Restaurant System. The **efficiency** of the restaurant will increase. Customers will now have a sense of **choice** when choosing if they want a waiter or to use the computer system. This system has the capability to remove all worries of your restaurant!

2 System Features

- Placing an Order
 - Via Mobile or Desktop
- Checking a table status
 - A table is labeled as dirty, clean, or occupied.
- Statistics
 - The ability to view the statistics of the restaurant stock items.
- Changing the Menu
 - Menu items can be deleted, added, and even edited in terms of the contents of the particular item.
- Editing Employees
 - Employees can be added as well as deleted from the system.

3 System Requirements

- Desktop
 - sql
- Mobile Device
 - iOS device with version 4 or later
 - Server with php version 4 or later
 - sql

- Efficiency
- Speediness
