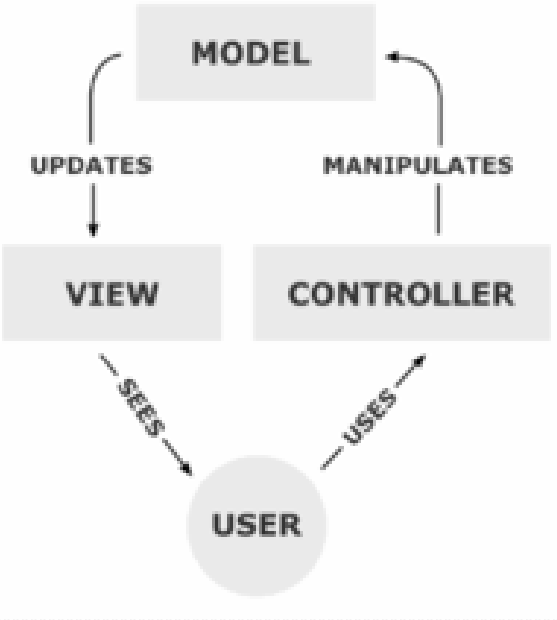
Restaurant Automation: GravyXpress

Group 4:
Nabil Ali
Yehuda Cohen
Amizan Jaleel
Rohit Lakshmanatirthakatte
Abdul Rattu
Shivani Sethi

Web Application

- Versatile – a web browser is all that's needed to run the app!
- Cross-platform compatibility
- Now, with HTML5, new, rich, and interactive user interfaces can be created



Who and What is it for?

- GravyXpress is for Restaurant managers and owners.
- It is used to make communication between employees easier and to help make an employee's tasks easier to understand and execute.
- It is accessible by both employees and customers.

With GravyXpress, different employees can complete different tasks:

- Waiter:
  - Can view orders and costs of each order
  - Can change the status of tables from opened to closed or vice versa

The future

We plan to continue making our user story code implementations work together

We plan to follow the given schedule and meet deadlines
