

User Documentation

Stock Prophit

Group 11

Frank Bohn, Asim Alvi, Eric Lee, Gio DeGrande, Sangit Patel, Andrew Demoleas

I. Navigation

The Navigation Bar consists of four parts:

- 1.Home
- 2.Favs
- 3.Top 5
- 4.Social

II. Home

The Home Screen consists of 3 sections

1. Search Bar
2. News Feed
3. Navigation Bar

III. Searching

To search for a stock and get it's prediction, type the name or the stock symbol of the respective stock into the search bar. You can locate the search bar by looking for where it says "Enter Ticker Symbol". After this press the send button and displayed on the screen will be the information about the stock, including current price and predicted price. To go back simply click the StockProphit logo in the upper lefthand corner.

IV. Favorites

After searching for a stock the user is brought to a page with the stock's information. On that same page in the top right corner is a check box. If the user checks that check box then the respective stock is added to the favorites list.

In order to access the favorites list simply click the Favs tab on the Navigation Bar.

V. Top 5

The User can view the Top 5 by clicking the Top 5 tab on the Navigation Bar.

VI. Social

The Social section is split up into one field and five buttons.

1. The user can make a post about a certain stock. By typing in their respective post in the text field and then pressing the submit button.
2. The user can search for another user by clicking the search button. Following this the user will be prompted to a page where there will be a textfield and a button. The user simply needs to the name of the person he or she is trying to search for and click search.
3. Clicking the View My Profile Button allows the user to see his or her own personal profile page.
4. On any given profile page there is a Follow Checkbox in the top right corner. Checking this box will allow you to follow that particular user.
5. Followers shows the names of those that are following you.
6. Following show the list of stocks that you are following.

Here the user can also search for users by typing in the users name and clicking search.
