

# Traffic Monitoring System

<http://traffichistory.org/>

## Abstract

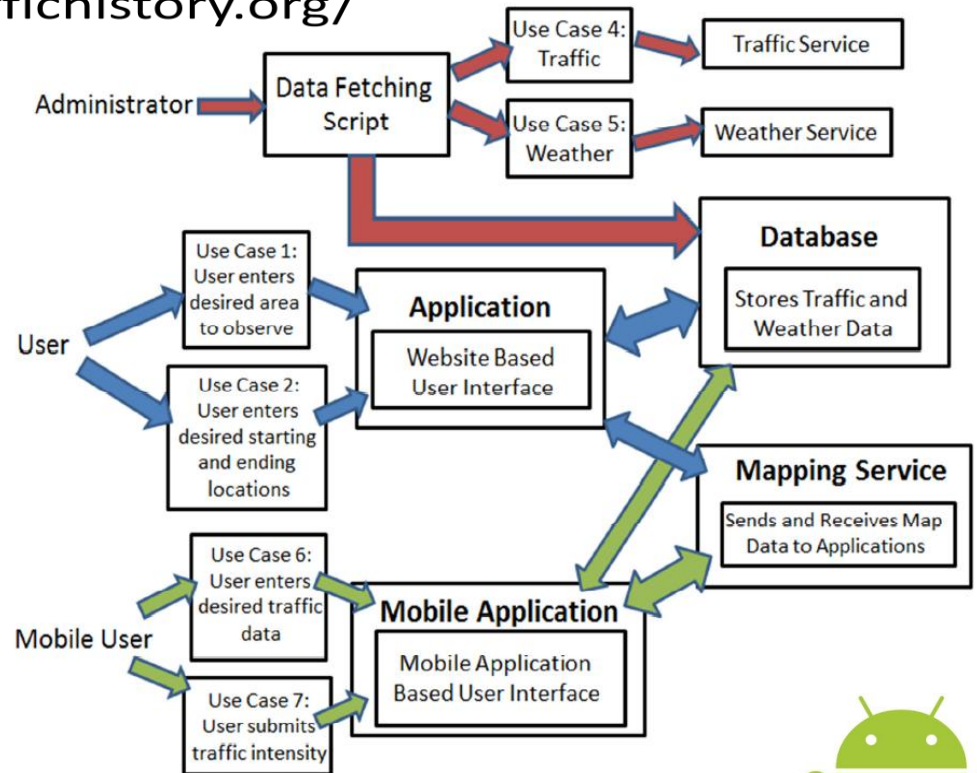

Our amazing mapping system gives consumers a variety of new features. By averaging historical traffic and weather information, our system is able to provide the best route for traveling, based on weather and time of day.

## Features

- View Traffic History & Weather Conditions at the Desired Location and Date
- Gives Directions for the Best Route while avoiding Traffic

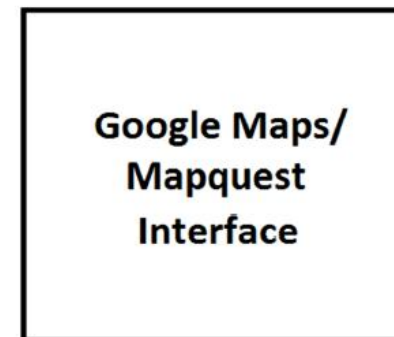

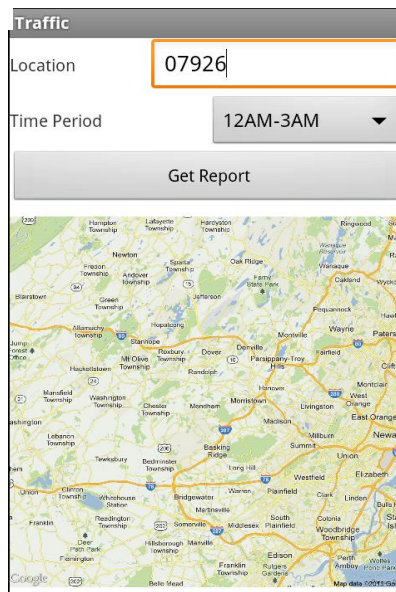

## Data Collection

- Obtains Traffic and Weather Information At Regular Intervals from APIs
- Stores into Database

## Now Supported by Android!

- Traffic Report Accessible Through Android App
- Traffic Incidents can be Reported through App

Time:   
Weather:   
Zip Code:   
Starting Location:   
Destination:
